EMERGENCY DEPARTMENT / RESEARCH PROTOTYPE

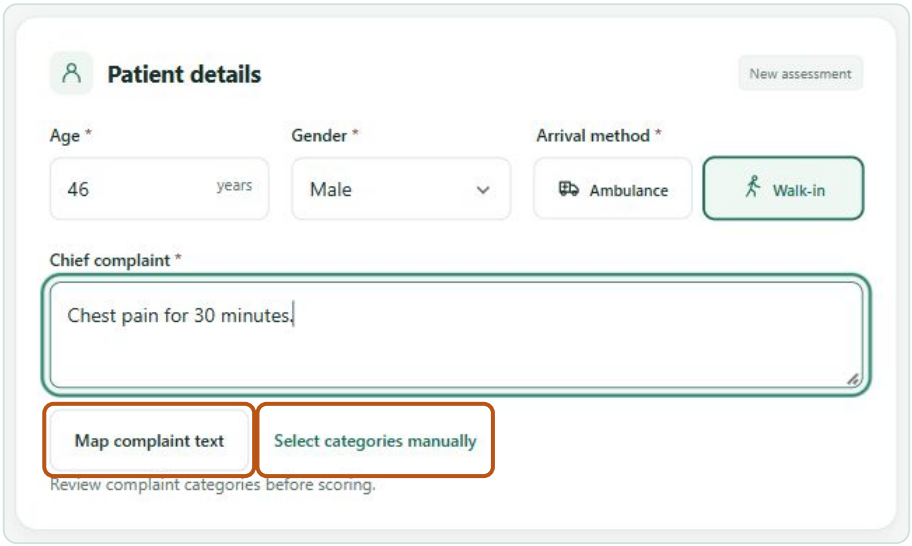

ESI triage quick guide

Try the website with a fictional adult case. No account is needed.

Open the ESI triage prototype

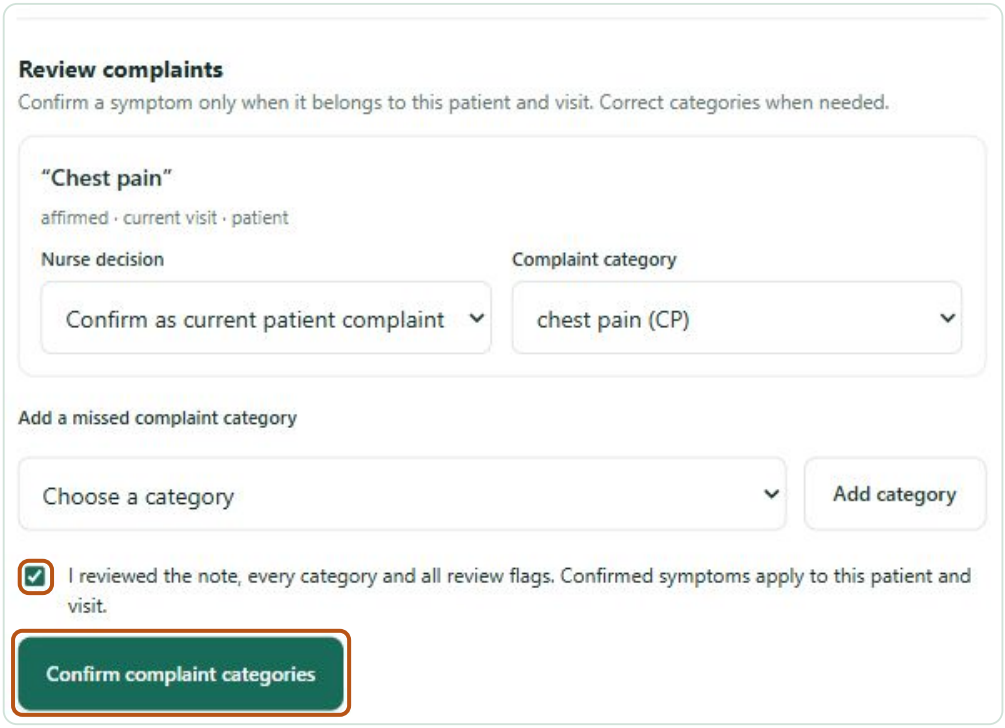

1 Enter the chief complaint

In **Patient intake**, enter age, gender and arrival method. Type the chief complaint in English, then select **Map complaint text** or **Select categories manually**.

2 Confirm the complaint categories

Confirm or exclude uncertain mentions and add any missing category. Check the review box, then select **Confirm complaint categories**.

Vitals, ESI and the queue

3 Enter vitals

Enter at least five of the six vital signs directly below the complaint. Leave an unavailable measurement blank, then select **Review ESI suggestion**.

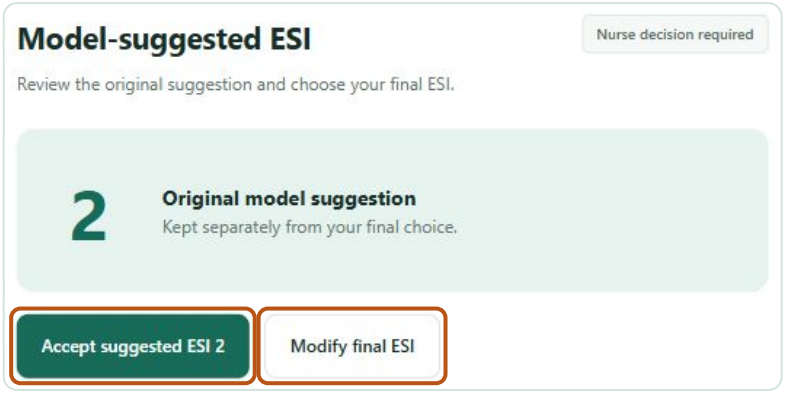

Then review the ESI

4 Review the ESI and add the case

Accept the suggestion or select **Modify final ESI**, choose a level and save it. Then select **Add reviewed case to queue**.

Then add the case

5 Call the patient in

Open the case in the **Waiting** queue and select **Call patient in**. The case moves to the **In care** tab.
